SAFE-T-BEAR'S HEALTHY HABITS WHEN "LOGGED" ON TO THE COMPUTER

Hey Kids... try to keep your monitor or laptop screen 18" to 30" away. The top of the monitor should be just below eye level.

Being in a darkened room is cool, BUT, to avoid eye strain, you should use the same amount of lighting that you use when you read a book.

> When Jr. Bear and I "log In" we use real log furniture! Hey... we're bears! You should use a height-adjustable chair with lower back support. Always keep those lower paws ... I mean feet planted, planted on the floori

Keep your elbows and front paws (arms) as parallel to the floor as you can. Wrist pads work great if you need them.

Get Up And Stretch As Much As You Can!
